### Product Description

Wireless speeds up to 10 times faster than today's 3G from any other national wireless carrier (view larger).

Samsung **Galaxy Note II** brings a whole new category of smartphones to Sprint. This high-performance device boasts many rich features and is indispensable when it comes to entertainment and productivity thanks to an enhanced S Pen hover experience, intuitive software, and elegant hardware features. Touch, hover, scribble, and speak—the Note II offers multiple tactile ways to interact. Capture and create with the innovative S Pen and preloaded apps like S Memo and S Note. Enjoy multitasking, intuitive interactions, customizable home screens, and more on the latest Google OS Android 4.1, Jelly Bean and the Samsung TouchWiz platform. With the latest HD Super AMOLED Plus technology powering the Note II's 5.5-inch 720P display, images are bigger, clearer, and brighter than ever allowing you to view color-rich movies, photos, presentations, and gaming. With Note II performance and power are automatic, thanks to Samsung's Exynos 1.6 Ghz quad-core processor, a long-lasting battery, and blazing fast 4G LTE network speeds.

#### For Business and Beyond

Office from anywhere, keep business data secure and remain in compliance with IT policies with Note II, a Samsung Approved for Enterprise (SAFE) device that supports Mobile Device Management (MDM), on-device encryption (ODE), corporate email/calendar/contacts, and Virtual Private Networks (VPN). From multitasking features to IT security to tools for efficiently sharing ideas, Note II is built for business.

A clear, crisp display paired with a comfortable and secure one-handed grip mean clarity and portability that goes where you go.

Enjoy a more PC-like experience with the S Pen hover capability, which allows you to interact with the screen without touching it directly. Hover to find contextual information, preview links, and magnify websites.

The high-performance Samsung Galaxy Note II, featuring a high-capacity battery and 4G LTE network capability, gives you the power to blaze through any task with confidence.

Experience quick response and smooth playback thanks to the powerful performance of the Samsung Exynos quad-core processor.

**Samsung Galaxy Note II At a Glance:**

- 4G LTE connectivity
- Android 4.1 (Jelly Bean)
- 1.6 GHz Samsung Exynos Quad-core processor
- 5.5-inch HD Super AMOLED Plus display
- Enhanced S Pen (6.5)
- Dual cameras - eight MP with video and flash, 1.9 MP front-facing
- 16 GB ROM, 2 GB RAM, MicroSD card slot supports up to 64 GB
- NFC technology
- 3100 mAh battery

Capture and share your ideas in even more creative ways with the Premium Suite: Create detailed notebooks with S Note tools for recognizing shapes, solving math formulas, and completing text searches.

Open, view, and edit Microsoft Office and Google documents on the go with Polaris Office.

**Android Beam**

Share info with other smartphones faster than ever. Beam allows you to share contacts, YouTube videos, maps, webpages and more by simply touching two phones together. Need to share directions? Bring up the map, align the backs of the two devices and press "touch to beam."

**The Enhanced S Pen Experience**

A refined and more accurate S Pen makes the Galaxy Note II easier and more intuitive to use. The Hover feature delivers more functionality with fewer clicks, making you more productive. The pen is now eight millimeters longer and one millimeter thicker, making it more comfortable to use.

**Hover**

The device recognizes pen proximity to the screen (before touching the screen) and creates interaction opportunities for new behaviors, information and user experiences.

**Contextual Awareness**

When you remove the S Pen from its slot, a pop-up with S Pen related apps appears on the display. Apps include S Pen, S Memo, Zen Brush, and third party apps using S Pen SDK.

**Additional Features**

**Eight MP camera with video and flash** (view larger). The Galaxy Note II comes fully loaded with features. Access all your content anytime from anywhere with AllShare Play. Get all the Sprint services with Sprint ID, TV, Radio, MusicPlus and more. Keep up to date with all your favorite sports teams, stream movies, shop online and listen to tunes all with your phone. The Galaxy Note II also comes with Google Play, which gives you access to thousands of apps, and the Samsung Media Hub.

**Vital Statistics**

The Galaxy Note II measures 5.9 x 3.2 x .4 inches and weighs 6.3 ounces.

**What's in the Box**

Samsung Galaxy Note II device; 3100 mAh ion lithium battery; AC charger/USB cable combo; English Getting Started Guide; Spanish Getting Started Guide; Recycle bag

**Connectivity**

- **Ultra-fast 4G LTE connectivity**
- **Wireless-N Wi-Fi networking (802.11b/g/n)** for accessing home and corporate networks as well as hotspots while on the go.
- **Built-in mobile hotspot functionality** allows up to 10 Wi-Fi enabled devices to share the 3G or 4G experience on the go with a laptop, camera, music player, game unit, video player, or any other Wi-Fi enabled device.
- **Bluetooth connectivity (version 4.0)** backward compatible with older Bluetooth-enabled peripherals and includes stereo audio streaming.
- **Near Field Communication (NFC)** for sharing contacts, web pages, directions, and more to compatible phones as well as payments via Google Wallet.
- **GPS for navigation and location services**
- **Integrated Google Maps** with turn-by-turn navigation, street and satellite views.

**Camera**

- **Rear-facing camera** Eight MP with video and flash
- **1.9 MP** for video chats and self portraits.

**Memory**

- **RAM** two GB
- **ROM** 16 GB
- **MicroSD card slot** supports up to 64 GB

**Hardware**

- **1.6 GHz Samsung Exynos Quad-core processor** speeds up everything—from playing games to watching shows to opening files from work
- **5.5-inch HD Super AMOLED Plus touch screen**

**Communications & Internet**

- **Web browser** with full HTML browser and Google Search
- **Text (SMS) and picture/video (MMS) messaging**
- **Access to popular instant messaging services**
- **Personal and work e-mail**

**★★★★★ A true futuristic device. A class of its on!** December 5, 2012

Reviewer: AndroidDude

I'm somewhat of a "Tech junkie." Therefore, I've owned/own my fair share of devices. Iphone 3g, 3gs, HTC EVO, EVO 3D, Galaxy TAB 7.7, Droid Razr Maxx, and droid DNA by HTC, to name a few. This by far does what all the above do and MORE. I am not a Samsung fan, but as of late they have set the bar in what modern tech can be. Anyone debating on making the leap to this monster of a device shouldn't hesitate! I thought the size would make it uneasy to handle since I have small hands but, I quickly got used to it. It also has 1 handed mode, where you can switch the keyboard, phone dial pad, and even the calculator to favor either side with the touch of an arrow! I know women who have no problem operating the phone with the smallest hands. There is already a wealth of accessories at your disposal since this is a global device, as well as being available on 5 U.S carrier's. This has taken over my tablet as my browsing and media device. The S-pen acts as a mouse with features like hovering over links to show previews of emails, web content, photo albums and even shows a live preview with sound of your videos just by hovering! this device is nothing short of amazing! of course, the main reason this device is made, being a phone, it is excellent and reception and 4g LTE connectivity where available. No dropped calls and everyone sounds clear and say that I sound clear on my end. Buy it!

Pros: super fast quad core 1.6 GHz processor.  
Large 5.5 inch super amoled 720 p HD screen non pentile version.  
A plethora of the features including the extra features that that s pen enables.  
Great battery life with 3100 mah battery which is removable.  
Micro sd slot for up to 64 gbs of external storage.

Cons: Pricey, but you will not need to worry about your device becoming obsolete before your next device, as its packing the latest and greatest in every aspect besides the 1st and only 1080p display in the USA on the DNA. Which that device has ONLY a 2020 MAH battery, and a few other shortcomings which I don't need to list in this review.

A little large, but as I mentioned you will quickly become accustomed to the size and everything else will feel unnecessarily small. Making myself wonder why I ever wanted such a small device especially with this being pocketable.

My conclusion. This is hands down the best device for all your entertainment, productivity, and typical smartphone needs!

**★★★★★ Innovative. Best phone on the market.** November 26, 2012

Reviewer: K.Dawn "Olivia" (OR) -

This phone amazes me every day. It is not only fun to use and explore, but seriously one of the most interesting gadgets I've ever used. I bought the iphone 5 first, which I was super excited about at the time. After 2 weeks of glitches, dropped calls, microphone malfunctions, and boring interface I decided to try out the galaxy. WOW. A world of difference. The iphone seems like a dinosaur next to this phone/mini computer. I love my galaxy note II, and having the iphone first makes me appreciate this phone that much more. There are so many cool features, like handwriting texts with the s-pen, burst shot photography, you can make cool and intricate artwork with using the pen and appropriate applications, the list goes on and I'm still learning. This is the best phone I've ever had by far. It has excellent call quality, I have yet to have a dropped call, and unlike the iphone 5 everyone can actually hear me! The screen displays vivid colors and is the perfect size for viewing videos and photos but not too large that it's a nuisance. I highly recommend this phone.

**★★★★★ Best Phone ever** November 16, 2012

Reviewer: Dale Chung (Los Angeles, CA, USA) -

I have waited long time. This phone is fast.(Faster than Laptop). I was with Verizon and I could not wait until November 27. I went to check with SPRINT. They have better phone plan Unlimited Data and much cheaper than Verizon. I switched and found it worked better in my house. I teach the computer in my church and found they have 4G coverage in the area and Verizon does not have 4G in the area. It works better. Most of my friend who has I-Phone checked this phone and find this is more responsive and smooth than I-Phone. My daughter should use medical program for her work and her performance goes up because of the faster speed of the response. Because of quad core process, the web response become much faster. I am not worried about the storage because I have installed 64 GB micro SD card. I checked the navigation. This is much smoother than GPS. I am considering to buy the mount and car charger. Once I changed to manual sync from auto sync of my e-mail accounts, the battery can hold 2 days enough. This become the walking entertainment machine for me since you can enjoy the U-Tube. I don't need to buy I Pad and I-phone. I could use for both. I am very happy with my purchase from SPRINT.

**★★★★★ Responsive and Powerful** November 26, 2012

Reviewer: Internet Wizard

I had an iPhone 3GS that kept getting slower with each OS update. The battery finally died after nearly 3 years. I originally tried the first Note phone in June and the touch screen software was clumsy while the pen was uncomfortable to use.

The pen has pressure sensitivity and I use it to draw with often. It's got a good camera, and the native software do their jobs well. It's good enough for anything I can think of so far, and I'm very happy with its responsiveness. It's a great piece of hardware on the inside, however the outside visual aesthetic is boring (aside from being thin, grey, and smooth) but that doesn't matter if you buy a case. I have a serious case of man hands and this phone feels right.

And Google maps is awesome on this phone. One of the biggest reasons why I chose not to go with the new iPhone is because of their sub-par Apple branded map app. I am astounded how many leaps and bounds Google maps is beyond the Apple Map app. I am very glad I switched, and I am very happy with this piece of hardware. I got a blue tooth headset two weeks after I bought this phone, and I feel like I am in the future now.

**★★★★★ Great phone!** November 25, 2012

Reviewer: Bosco kim

Amazing phone. Switched from iPhone 4s. I love this communication device. Does everything a tablet, computer, camera, and phone should do. Great apps. 4G LTE is so fast.
